

TRIM & FASCIA SIDING & PANELING

EXTERIOR PRODUCTS BY TFP

Cedar is an **environmentally friendly** product. It leaves a much smaller carbon footprint than cement, PVC, or metal-based products. Job trim ends and sawdust naturally decompose (as a tree would) minimizing any impact on the Earth.

Properly installed cedar products are **low maintenance**, and will provide decades of problem-free service. Evergreen exterior products are manufactured by Terminal Forest Products (TFP), a name trusted in the building industry for decades.

TFP is so confident in the performance of Evergreen that a **50 year warranty** is provided on every purchase. Evergreen products are **made in the USA** and are readily available in all standard sizes and profiles from your supplier.

FINISHING TIPS

- Factory or field-apply oil-base prime coat on all surfaces
- Use 2 coats of 100% acrylic latex paint for top coats (do not use stains)
- Use hot-dipped galvanized aluminium or stainless steel nails
- Caulk all joints with polyurethane, polysulphate, or latex-silicone caulk
- Fill all nail holes with a good quality wood putty
