Minimal Maintenance costs (materials, labor, energy) <ul style="list-style-type: none"> • No water absorption or swelling • No rotting • Impervious to insects 		•
Interlocking Matrix™ creates a weather tight exterior envelope <ul style="list-style-type: none"> • Withstands 200 mph winds • Exceptional weather barrier • Strong and durable 		• • •
Length of boards and consistency of product produce less waste during installation	•	
Substrate is produced in ISO 14001 certified factories		•
Lifetime Limited Warranty (substrate and coating)		•

*Based on Department of Energy study at Oak Ridge Laboratory

Note: Certification opportunities are based on LEED for New Construction 2.2 and NAHB Model Green Home Building Guidelines

The Look That Lasts

NuCedar Mills' exterior cladding products accurately replicate the past's aesthetics, while delivering the future's durability. Milled from cellular PVC, the same material that has become highly popular in exterior trim, NuCedar offers a complete line of products including: Classic R&R Shingles™, Board and Batten, Channel Rustic, Shiplap, Trim, Mouldings, Classic Clapboard® and Classic Beaded Weatherboard™.

A World of Colors

Having your home the color you want is easier than ever. NuCedar siding and trim products are pre-finished with Polane® polyurethane from Sherwin Williams®. This coating bonds to the cellular PVC substrate and offers solar-reflective qualities, which may reduce cooling costs. This process provides the most durable finish on the market, ensuring your home will look great for years to come.

The Better Warranty

NuCedar's Lifetime Limited Warranty is one of the best in the business. The Material Warranty protects against rotting, delamination and damage caused by hail or insects, while the Finish Warranty covers against chipping, peeling or cracking. For the ultimate peace of mind, both the Material and Finish Warranties last for as long as you own your home and include labor replacement for the first full year of ownership*.
