

KILN DRIED KNOTTY PRODUCTS

WESTERN RED CEDAR

Proven durability, Rich color, Appealing texture

The natural beauty and durability of Western Red Cedar make it a popular, much sought after finished product for a variety of interior and exterior uses. In its natural unfinished state, it has a richly textured, tactile grain combined with a deep lustre in warm mellow tones ranging from light amber to deep chocolate brown. Western Red Cedar ages gracefully and endures for many years. As it ages it remains subtly aromatic, adding to its universal appeal.
