

Siding And Architectural Elements

The Look and Feel of Real Wood Without the Work

We know what you don't like about real wood decking and siding. The expensive, never-ending staining, waterproofing, painting and re-painting. Or the way it weathers inconsistently. Splinters. Unsightly warping, cupping and twisting in response to water and weather.

We also know what you DO like about real wood decking and siding. The natural, rich colors and texture, and the way it helps any space feel more alive.

We made **UltraShield® Naturale™** to be impervious to sun and rain, so it will stay looking and feeling as great as when you first installed it, without ever having to stain, paint, or any of that.

But we also made it to be the most natural-looking capped composite deck you can find. You know it when you see it - other composites look fake by comparison. Touch the surface and feel the smooth, slightly pitted mahogany texture. You won't find a more natural and exciting range of colors, and real wood texture, anywhere else in the world of composite decking and siding.

All that in a recyclable package combining high-density recycled plastics and recycled wood product. Choose **UltraShield® Naturale™**, and experience the satisfaction of using materials that are easy on the planet, on your eyes, and on your wallet all at once.

What Makes NewTechWood the Smart Green Choice?

All NewTechWood products are produced using 95% recycled materials including plastic bottles, reclaimed wood fibers, and other products that would normally end up in a landfill.

NewTechWood undertakes annual, third-party audits to assure compliance with environmental, health, and safety regulations and guidelines – a demonstration of our commitment to a greener alternative to wood building products that deplete the planet's resources.

NewTechWood shrinks your home's carbon footprint by using recycled materials constructed to be recycled again in the future.

NewTechWood's UltraShield® : The Look of Wood Without the Worry

Using its patent-pending process, called **Naturale™**, **UltraShield®** delivers convenience, reliability, and a realistic texture that, not only makes your life better, all NewTechWood products combine the proven strength of high-density, recycled plastic with realistic wood fibers to deliver the look of **Naturale™** wood; the look you demand.

UltraShield® : Ultra-Simple

UltraShield® is enclosed in an impermeable seal so your **UltraShield®** deck or home siding stands up to weather, sun, water, scuffs and scrapes. Your home looks good down the line because, with **UltraShield®**, durability is built in.

The UltraShield® Comprehensive Warranty

It's really simple.

Our **UltraShield®** decking is backed by the most comprehensive warranty in the industry.

NewTechWood stands behind its products, backed by a 25-year limited, transferable warranty. We are so confident in the quality of our decking that we'll refund the cost or replace the decking if it underperforms - and even cover the cost of labor during the first two years.

Durable, easy-to-install, low-maintenance solutions to all of your outdoor construction needs.

From Subtle to Spectacular: With NewTechWood's **UltraShield®** collection, there are no limits to your imagination.

Note: Some colors might be limited to certain profiles or countries, please consult with your local distributor.

Elegant Home Siding That Lasts

Why settle for aluminum or vinyl siding that looks fake, when you can have the same ease of installation, plus low maintenance, and rugged durability that stands up to any weather conditions, and the natural look of natural wood?

Our home siding looks like natural wood, without the worries of real wood exposed to the elements.

NewTechWood siding installs quickly using our exclusive clip system that creates a lasting seal between planks.

Our installation system enables your home to “breathe” as air circulates between siding and joists, keeping your home high, dry, and energy efficient.

When you want that clean modern appearance – those simple design elements that create “the look” you want, **UltraShield®** screens and partitions, stylistic statements that set your home apart without adding to all that maintenance.

Screen & Partition Accessories

K-33

EC-UH17

Screen & Partition Accessories

K-33
Material: #201 Steel
K-33 is used as a connecting mechanism between the joist and the decorative profile

K-33 has an oval hole designed for expansion and contraction. The other hole is used to fix the K-33 to the joist.

EC-UH17
Material: Plastic
EC-UH17 is used at the end of UH17 as a covering for the hollow chambers

EC-UH17 should be attached with a dab of silicon to ensure a secure fit.
