

Decking & Deck Tile

The Look and Feel of Real Wood Without the Work

We know what you don't like about real wood decking and siding. The expensive, neverending staining, waterproofing, painting and re-painting. Or the way it weathers inconsistently. Splinters. Unsightly warping, cupping and twisting in response to water and weather.

We also know what you DO like about real wood decking and siding. The natural, rich colors and texture, and the way it helps any space feel more alive.

We made **UltraShield® Naturale™** to be impervious to sun and rain, so it will stay looking and feeling as great as when you first installed it, without ever having to stain, paint, or any of that.

But we also made it to be the most natural-looking capped composite deck you can find. You know it when you see it - other composites look fake by comparison. Touch the surface and feel the smooth, slightly pitted mahogany texture. You won't find a more natural and exciting range of colors, and real wood texture, anywhere else in the world of composite decking and siding.

All that in a recyclable package combining high-density recycled plastics and recycled wood product. Choose **UltraShield® Naturale™**, and experience the satisfaction of using materials that are easy on the planet, on your eyes, and on your wallet all at once.

What Makes NewTechWood the Smart Green Choice?

All NewTechWood products are produced using 95% recycled materials including plastic bottles, reclaimed wood fibers, and other products that would normally end up in a landfill.

NewTechWood undertakes annual, third-party audits to assure compliance with environmental, health, and safety regulations and guidelines – a demonstration of our commitment to a greener alternative to wood building products that deplete the planet's resources.

NewTechWood shrinks your home's carbon footprint by using recycled materials constructed to be recycled again in the future.

NewTechWood decking is super-simple to install.

Your NewTechWood deck expands and contracts under various weather conditions without creating wear and tear on individual planks using our easy to install clip systems that keep your deck looking its best for years to come.

Install it once, and forget it.

Using a system of locking clips, NewTechWood installs quickly, but more than that, our proprietary controlled expansion and contraction clip eliminates warping, or any distortion of our industrial strength planking, providing decking that lasts for years with simple, easy maintenance.

			
TC-2 (CEC Clip)	TC-1 (Locking Clip)	MG-1 (CEC Clip)	MG-2 (Locking Clip)

Due to the small gap of the MG Clips there might be differences in gap sizes after installation as the composite itself has width tolerances.

Please contact the manufacturer to understand if this clip is approved to be installed in your area.

Starting Clip

Setting the first board is easy using NewTechWood’s MG-3 Starting clip. They’re invisible, easy to install, and these clips last and last so you don’t have to worry or fuss over your new installation.

End Caps

When you employ our lightweight, hollow core decking, these end caps finish the job, creating a clean, **Naturele** look that’s guaranteed to last for years to come.

NewTechWood Decking Repair Kit

Use this simple repair kit to clean up end caps, dents, nail holes, scratches, and other blemishes.

Colors: maple, teak, ipe, walnut, redwood, antique, light gray, charcoal, smoke white

Each repair kit comes complete with two 10cm wax sticks plus an easy-to-use applicator to finish any job with professionally-installed good looks.

Starborn Cap-Tor Screws

These industry standard screws are ideal for finishing start and end planks, fascia, and stair treads.

NewTechWood is also the leading manufacturer of capped composite siding – check us out online!

Deck Tile in Your Style

UltraShield® delivers a simple, do-it-yourself solution for unsightly spaces, like concrete balconies, or cement “decks” off the back door.

Turn these eyesores into stylish outdoor living space no matter where you live. **UltraShield®** deck tile stands up to any weather – and that’s guaranteed.

Turn that concrete slab into an elegant floor wrapped in the look of exotic hardwoods that fit your style, and your “eye”.

UltraShield® deck tiles are highly-stain resistant and ultra-low maintenance so you enjoy your outdoor living space more with each passing season.

Choose from the full palette of **Naturale™** colors to create the perfect look for your perfect space. Installs simply using an inter-locking TPO polymer matrix base and stainless steel screws.

Completely flexible locking system that can be secured from any side. **UltraShield®** deck tiles adapt to your needs, not the other way around.

Matching fascia is available to complete your style statement.

UltraShield® Deck Tiles is backed by 10 year limited transferable warranty.

Grass Deck Tiles

We are proud to introduce our newest line of deck tiles, the result of months of obsessing over grass. That is right! Height, color, and blade width are just some of the features of grass we have carefully studied, leading us to conclude that we should replicate the Zoysia Grass species and in fact, we have succeeded in duplicating Mother Nature. NewTechWoods new grass deck tiles give you the luxury of grass without the maintenance. You will never have to mow or water your grass again and it will stay that a vibrant and luscious green without lifting a finger. These tiles also do not show any seams, as to break the illusion. Use NewTechWood grass deck tiles to transform a drab area to a verdant living space, full of life and color. Finally, these deck tiles are also compatible with NewTechWood QuickDeck Composite Deck tiles, leading to a flexible array of design options.

Stone Deck Tiles

Why do you need stone deck tiles? Deck tiles are extremely versatile and a great way to complete your deck in an aesthetically pleasing way. Deck tiles with a stone look are often popular because they convey an air of strength and natural beauty. As long as you have a clean, dry, flat surface to work with, installing deck tiles is incredibly simple — so simple, in fact, a child can do it.

Quality interlocking stone deck tiles look great and fit together easily. They are a breeze to install and are a snap to incorporate into your deck design. We think you will find that they are an eye-catching part of a full deck set up that exude quality and signify the care you take in the exterior appearance of your home.

If you are familiar with NewTechWood and our composite wood decking material, you may be curious as to whether or not we can offer durable stone decking material as well. The great news is that we now have a great selection of synthetic stone deck tiles to meet our customers’ stone deck tiling needs.

Elegant Home Siding That Lasts

Why settle for aluminum or vinyl siding that looks fake, when you can have the same ease of installation, plus low maintenance, and rugged durability that stands up to any weather conditions, and the natural look of natural wood?

Our home siding looks like natural wood, without the worries of real wood exposed to the elements.

NewTechWood siding installs quickly using our exclusive clip system that creates a lasting seal between planks.

Our installation system enables your home to “breathe” as air circulates between siding and joists, keeping your home high, dry, and energy efficient.
